Course Evaluation Questionnaire
General Physics I Fall 2005

How would you describe the amount of physics you learned in this course?

- [ ] I learned a lot
- [ ] I learned some
- [ ] I learned little
- [ ] I learned nothing

How would you describe the amount of work required for this class?

- [ ] Way too much
- [ ] A little too much
- [x] About right
- [ ] A bit more needed
- [ ] Lots more needed

How would you rate the math level for this course?

- [ ] Way too high
- [ ] A bit too high
- [x] About right
- [ ] A bit too low
- [ ] Way too low

What was the best part of this course?

[Learning about sound waves]

I also enjoyed the labs, especially since it all directly related to the classroom stuff.

What was your least favorite part of this course?

The class being at 8:30. It's just hard for me to focus.

If you could change one thing about the course so that you learn more from it, what would it be?

What one thing would you recommend that not be changed about this course?

[liked how you explained everything we needed to know in class]

What was the best part of this course?

I enjoyed learning about energy. I felt that the labs were very applicable to what we were talking about in class. The in class demonstrations helped to stimulate my interest.

What was your least favorite part of this course?

My least favorite part of the course was having to do the lab write-ups for class the next day. I understand the lab write-ups are important, but maybe they could be due like Monday if lab is Thursday.

If you could change one thing about the course so that you learn more from it, what would it be?

What one thing would you recommend that not be changed about this course?

I recommend the in class demonstrations not be changed because they helped me to learn the concepts better.

What was the best part of this course?

I really enjoyed the labs — they were set up well to apply what we had talked about in class.

What was your least favorite part of this course?

Sometimes the homework was difficult to figure out, and ended up taking a long time to do.

If you could change one thing about the course so that you learn more from it, what would it be?

What one thing would you recommend that not be changed about this course?

The demonstrations done during lectures — they were both humorous at times and very helpful.

Any other suggestions or comments?

I really have appreciated all of your help, especially how involved you have been in helping us understand things in lab and your enthusiasm in class always kept me interested and thus I learned a great deal in this class.
