Search results

Search results are displayed for the items that match your search criteria. To see more information about a specific item, click its title. This screen also provides utilities that allow you to:

- Change the sort order of your results
- See databases that were searched (also see Advanced search)
- Access electronic resources
- Access availability and order and format information (if applicable)
- Refine your search
- Select items from a currently displayed page and add them to a list
- Perform an advanced search

Introduction
Search results are sorted in the order your library configures:

- Library
  - If you selected a library, results for that library only are displayed.
  - If you selected a library group (if applicable), results for that group only are displayed.
  - If you selected Libraries Worldwide (WorldCat), results for the library appear first, followed by group results (if applicable), and then WorldCat results.

- Relevance is the result of a ranking scheme that is based on the following:
  - Whether the search terms appear anywhere in the WorldCat bibliographic record.
  - Whether the search terms appear in the title, author, or subject field are ranked highest.
  - Proximity of the search terms to each other.
  - The number of libraries that report owning the item.
  - How recently the item was published.

Sort order
You can choose among these additional sort options, as determined by your institution:

- Library and Relevance
